**RE: Citizens Utilities Rural Company, Inc. d/b/a Frontier Citizens Utilities Rural  
T-01954B-11-0452 - VoIP-PSTN Traffic - Amendment**

Dear Corporation Commissioners and Staff:

Enclosed please find an original and thirteen copies of the amended tariff filing for Citizens Utilities Rural Company, Inc. d/b/a Frontier Citizens Utilities Rural (Frontier) for review and approval.

The purpose of this amended filing is to clarify application of interstate and intrastate rates and to clarify that the PVU factor applies only to intrastate traffic.

AT&T's letter filed on March 21, 2012, asserts that the FCC required the "application of rates not higher than interstate switched access rates to both originating and terminating VoIP-PSTN traffic".<sup>1</sup> AT&T asserts that the PVU factor should be applied only to intrastate traffic, and that the PVU factor should be applied retroactively to December 29, 2011.

The FCC recently provided clarification that fully resolves AT&T's concerns. *In the Matter of Connect America Fund, Second Order on Reconsideration* (April 25, 2012), Para. 30, the FCC provides that intrastate originating access rates apply for originating intrastate toll VoIP traffic (including traffic that originates in IP, terminates in IP, or both) until June 30, 2014. In addition, the Order clarifies that interstate rates will apply to originating access for VoIP-originated traffic for the period of December 29, 2011 through the effective date of the FCC's April 25th Order, which will occur 45 days after publication of the Order in the Federal Register. Additionally, as stated above, the amended tariff clarifies application of the PVU factor.

Finally, AT&T argues that Frontier should be required to make a "certification" about whether it offers VoIP services. Frontier Citizens Utilities Rural Company does not currently provide retail VoIP services.

The amendment and letter provides the clarity necessary to approve Frontier's tariffs.

<sup>1</sup> Letter from Sharon Mullin, Director AT&T Services to Arizona Corporation Commission Docket Control (March 21, 2012).

ACCESS SERVICE

2. General Regulations (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.9 Coordinations with Respect to Network Contingencies

The customer shall, in cooperation with the Telephone Company, coordinate in planning the actions to be taken to maintain maximum network capability following natural or man-made disasters, which affect telecommunications services.

2.3.10 Sectionalization and Trouble Reporting

The customer will be responsible for reporting troubles sectionalized to Telephone Company facilities and/or equipment. When trouble cannot be clearly sectionalized to the Telephone Company facilities and/or equipment, the Telephone Company will test cooperatively or independently to assist in trouble sectionalization.

2.3.11 Identification and Rating of VoIP-PSTN Traffic<sup>1</sup>

(A) Scope

- (1) VoIP-PSTN Traffic is defined as traffic exchanged between the Telephone Company end user and the customer in time division multiplexing ("TDM") format that originates and/or terminates in Internet protocol ("IP") format. This section governs the identification of VoIP-PSTN Traffic that is required to be compensated at interstate access rates by the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (Nov. 18, 2011) ("FCC Order"). Specifically, this section establishes the method of separating such traffic (referred to in this tariff as "Relevant VoIP-PSTN Traffic") from the customer's traditional intrastate access traffic, so that such Relevant VoIP-PSTN Traffic can be billed in accordance with the FCC Order.

<sup>1</sup> On April 25, 2012 the FCC released its Second Order on Reconsideration of the USF/ICC Transformation Order. Based on this Order, the tariff language in this section will also apply to originating access for VoIP-PSTN traffic for the period of December 29, 2011 through the effective date of the FCC's April 25th Order, which will occur 45 days after publication of the Order in the Federal Register.

(M) Item 2.4.1 relocated to Sheet No. 14.

ACCESS SERVICE

2. General Regulations (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.11 Identification and Rating of VoIP-PSTN Traffic (Cont'd)

(N)

(A) Scope (Cont'd)

- (2) This section will be applied to the billing of switched access charges to a customer that is a local exchange carrier only to the extent that the customer has also implemented billing of interstate access charges for Relevant VoIP-PSTN Traffic in accordance with the FCC Order.

(B) Rating of VoIP-PSTN Traffic

The Relevant VoIP-PSTN Traffic identified in accordance with this tariff section will be billed at rates equal to the Telephone Company's applicable tariffed interstate switched access rates as specified in the Telephone Company's applicable Federal Access Tariff.

(C) Calculation and Application of Percent-VoIP-Usage Factor

The Telephone Company will determine the number of Relevant VoIP-PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under subsection (B), above, by applying a Percent VoIP Usage ("PVU") factor to the total terminating intrastate access MOU received by The Telephone Company from the customer. The PVU will be derived and applied as follows:

- (1) The customer will calculate and furnish to the Telephone Company a factor (the "PVU") representing the percentage of the total intrastate access MOU that the customer terminates to the Telephone Company in the State, that is sent to the Telephone Company and that originated in IP format. This PVU shall be based on information such as traffic studies, actual call detail, or other relevant and verifiable information.
- (2) The Telephone Company will apply the PVU factor to the total terminating intrastate access MOU received the customer to determine the number of Relevant VoIP-PSTN Traffic MOUs.
- (3) If the customer does not furnish the Telephone Company with a PVU pursuant to the preceding paragraph 1, the Telephone Company will utilize a PVU equal to zero.
